

TAC PRO® STRAP-ON CHEEK RISER, INSTALLATION INSTRUCTIONS

1. Take one of the long straps and thread it through the vertical slots as shown above. Make sure that the loop side of the strap is facing the front of the cheek rest.

2. With the rifle unloaded, spread the lower edges of the saddle slightly and slip it onto the stock in the desired position.

3. Take the shortest strap and thread it through the front horizontal slot from top to bottom. Make sure the loop side of the strap is facing the stock.

4. Loop the strap under the stock and up through the slot on the other side. If your rifle has a sling swivel, loop one strap on each side of the swivel as shown above.

5. Pull all the straps tight and close them by attaching the hook end to the loop end. Adjust the cheek rest height and lock in place by tightening the 4 screws
